

# IT changed the way you do business.

## Now your business can change the way it does IT.

SystemWatch managed IT services from ITEX will completely change the way you look at operational IT. Instead of waiting for a problem to occur and then sending a technician out to fix it, we take a proactive approach, managing your IT assets to minimise the chance of them breaking in the first place. Put simply, we don't make money when your systems don't work, we make it when they do.

And there's more. By sharing the responsibility for some or all of your IT assets, you free up time and resources to concentrate on making your core business more efficient.

SystemWatch is available in three levels of service, from simple monitoring and maintenance to total management of your IT – all for a fixed monthly fee. To find out more email [systemwatch@itex.je](mailto:systemwatch@itex.je).
