Let's talk mobile safety

Carrying a mobile phone can help keep you safe and give you peace of mind.
Unfortunately mobiles are attractive targets for opportunist thieves so it's important that you follow these simple steps to protect your phone.

- **Never leave your phone unattended or on display in a public place**
- **Learn to use the built-in security features**
- **Make sure your phone is insured for its full value**
- **Get your handset security marked by the Police**

If your phone is lost or stolen, you should **report it to the Police immediately**. You should also call our mobile helpline on **Freefone 152** for advice and to have your account temporarily barred.
