Confidential waste destruction on your doorstep.

Keeping your client information safe and confidential.

We are a small local company supplying a unique service to financial businesses both large and small.

We are the only confidential waste company that can guarantee the complete on site destruction of your office waste using our purpose built mobile shredding unit (access permitting).

Space in the vehicle for your staff to witness destruction of your waste if required.

We can also destroy CD's and tape media should you require.

What else do we do?

We supply confidential waste bins that have slam locks and non return shielding over the paper slot.

All bins are collected weekly, extra collections can be arranged to suit your requirements.

We also specialise in Archive and storage clear outs and can destroy approximately 300 standard Archiving boxes per visit. We recycle all used archive boxes. We can supply paper waste sacks with seals. Certificate of destruction issued at time of shredding.

Archive movement. Safe secure collection and retrieval of often valuable archives and confidential records.

Other recycling. We can assist with the supply of bins and bags for the separation of recyclable waste, metals, plastics and paper and redundant office equipment.
