

## Small and Richards Ltd

Electrical Contractors & Fire & Safety Engineers  
Installation, Service and Maintenance  
Fire Risk Assessment & Consultants  
Electrical Testing and Inspection

### Small and Richards Ltd have been established in Jersey for 35 years

Safety is of prime importance for both you and your property; at Small and Richards we offer full support and guidance on the latest Electrical standards and Fire-Safety legislation. As well as full design, installation and servicing of all Electrical and Fire-Safety systems both in residential and commercial properties.

**Portable appliance testing (PAT)** tests electrical appliances for safety and should be carried out yearly.

**Periodic testing** tests an installation to ensure it is safe to use and should be carried out every 10 years for residential and every 5 years for commercial properties. At Small and Richards we can do this professionally and quickly.

#### Fire and Safety

Fire Alarm & Safety systems are installed to provide LIFE SAFETY and should also be checked a minimum of twice a year or every 6 months. At Small and Richards we can carry these checks out affordably and with the least disruption to you or your business.

**Household battery or mains operated smoke detectors**, provide an early warning of Fire in your home and as such gives protection to you and your family, ensure you are all safe by testing these regularly, it only takes 5 minutes and can save a life.

### Fire Alarms, Safety systems, Intruder Alarms, CCTV and Extinguishers

We can supply and install all these from the latest wireless systems to conventional wired systems, at Small and Richards Ltd we offer free estimates and hassle free service, we can even service and maintain any existing system.

**Intruder Alarms.** Wireless and conventional Intruder alarms can be installed easily and monitored by yourself using your mobile phone saving cost and giving peace of mind.

**Access Control.** Cost effective Access Control or Door Entry can enhance the safety of any building and limit access to required areas.

**CCTV.** Designed and installed correctly, CCTV can give you the eyes in the back of the head. And modern recording systems ensure nothing is forgotten.

**Fire & Safety Systems.** Fire systems designed to save life and Property; Safety systems include systems which aid those with limited abilities in the case of an emergency.

At Small and Richards Ltd we pride ourselves on the Design, Installation and Service we provide our customers. With 24hr callout and service we offer that personal touch that is sometimes forgotten.
